Sir:

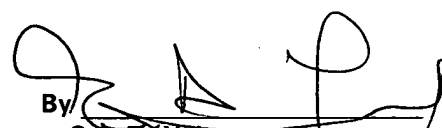

REQUEST FOR CORRECTED FILING RECEIPT

Enclosed is a copy of the filing receipt received in connection with the above-referenced patent application, which has been marked in red to show that the foreign priority information is missing and that the address of the first inventor is misspelled. We are also enclosing a copy of our executed Declaration showing the foreign priority information and a copy of the first page of WO 00/72638 showing the correct spelling of the first inventor's address.

Please forward a corrected filing receipt as soon as possible.

Respectfully submitted,

CHRISTOPHER J.A. BARNARDO et al

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections, facsimile number 703-746-9195. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

Preliminary Class

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

(54) Title: **ELECTROLUMINESCENT DISPLAY**

(57) Abstract: An electroluminescent display comprises a transparent front-electrode (1, 2), rear electrodes (5), and a layer of electroluminescent material (3) located between the first and second electrodes. Conductive tracks (9) are electrically connected to the rear electrodes (5) and supply a driving voltage for the electroluminescent material (3) to the rear electrodes (5). A backplane layer (7) is provided between the electroluminescent material layer (3) and the conductive tracks (9), and is electrically connected to the front electrode (1, 2), such that the potential difference across the electroluminescent material layer (3) in the region of the conductive tracks (9) is substantially zero. In this way, when the conductive track (9) is supplying the driving voltage to the rear-electrodes (5), the electroluminescent material layer (3) is not illuminated by an electric field between the conductive tracks (9) and the front electrode (1, 2). Gaps may be defined in the front electrode (1, 2) corresponding substantially to the location of the conductive tracks (9). This also prevents the voltage in the conductive tracks (9) from illuminating the electroluminescent material layer (3). An addressable electroluminescent display may be included in an item of clothing.
